Professional Summary

Motivated and analytical Data Science undergraduate at SLIIT with strong foundations in data analytics, machine learning, software engineering, and business intelligence. Experienced in developing data-driven applications, predictive models, interactive dashboards, and full-stack web solutions using Python, R, SQL, Power BI, Java, and MERN technologies. Passionate about transforming complex datasets into actionable insights and seeking internship opportunities in Data Science, Analytics, or Software Engineering.

Technical Skills

Programming Languages: Python, Java, JavaScript, TypeScript, R, SQL
Data Science & BI: Data Analytics, Data Warehousing, Machine Learning, Statistical Analysis, Power BI, R Studio, Google Colab, Advanced Excel
Web Development: React.js, Next.js, Node.js, Express.js, Nest.js, Spring Boot, REST APIs, HTML5, CSS3, Bootstrap
Databases: MySQL, MongoDB, SQL Server (SSMS)
Tools & Platforms: Git, GitHub, GitHub Actions, Postman, VS Code, Android Studio, Figma, Apache Tomcat
Soft Skills: Analytical Thinking, Problem Solving, Communication, Teamwork, Adaptability, Decision Making

Education

Bachelor of Information Technology (BSc Hons) Data Science Specialization Sri Lanka Institute of Information Technology (SLIIT)	2023 – Present
G.C.E. Advanced Level (Physical Science Stream) Passed (Combined Mathematics: C, Chemistry: C, Physics: S)	2022
G.C.E. Ordinary Level Passed with 6A, 2B, and 1C	2018

Professional Certifications

- Higher National Diploma (HND) in Information Technology – Sri Lanka Institute of Information Technology (SLIIT)
- Dean's List (1st Year, 1st Semester), SLIIT
- Python for Beginners – University of Moratuwa
- Web Design for Beginners – University of Moratuwa
- MongoDB Atlas Administrator Path Course

Academic & Software Development Projects

Student Performance Analytics (Individual Project) Technologies: Python, Streamlit, Pandas, Scikit-Learn - Developed an interactive machine learning application to analyze student performance factors. - Applied regression models and data preprocessing techniques to generate predictive insights.	
Business Analytical Project Technologies: Power BI, SQL Server, Excel - Designed ETL processes and dimensional data models for business reporting. - Built interactive Power BI dashboards to visualize key performance indicators.	Year 3 Semester 1
HR Analytical Research Project Technologies: R Studio, Statistical Analysis - Conducted statistical analysis on HR-related organizational data. - Applied data visualization and inferential analysis techniques to support findings.	Year 3 Semester 1
Smart Campus Web Application (Group Project) Technologies: Spring Boot, React.js, MySQL, Spring Security, GitHub Actions	Year 3 Semester 1

- Developed backend services using Spring Boot and Spring Data JPA.
- Implemented authentication, authorization, and CI/CD workflows.

Eco Cycle – Plastic Bottle Recycling System (Project Lead)

Year 2 Semester 2

Technologies: MongoDB, Express.js, React.js, Node.js

- Led development of a MERN-based recycling management platform.
- Designed APIs and database structures to support operational workflows.

HabitGo Mobile Application

Year 2 Semester 2

Technologies: Android Studio, Kotlin, SharedPreferences

- Developed an offline habit-tracking application with local data persistence.
- Implemented JSON-based storage and user activity management features.

AIT AI Therapist Mobile Application

Year 2 Semester 2

Technologies: Android Studio, Kotlin, XML, Figma

- Designed and developed user interfaces for an AI-powered mental wellness mobile application.
- Created multiple screens including onboarding, login, chat interface and user profile pages.
- Implemented screen navigation using Android Intents and applied modern UI/UX design principles.
- Developed responsive layouts using ConstraintLayout, LinearLayout, ScrollView, and reusable Android components.

Hotel Booking Mobile App UI Design (HotelEase)

Year 2 Semester 2

Technologies: Figma

- Designed a hotel booking mobile application prototype including search, booking, profile, and payment screens.

Online Event Planning System (Project Lead)

Year 2 Semester 1

Technologies: Java, HTML, JavaScript, Bootstrap, MySQL

- Developed an event planning and booking system using object-oriented programming principles.
- Led project coordination and backend integration activities.

Mr Taxi – Car Rental Web Application

Year 1 Semester 2

Technologies: HTML, CSS, JavaScript, PHP, MySQL

- Developed a responsive car rental website with booking functionalities.
- Integrated database-driven operations for vehicle and customer management.
