Professional Summary

Third-year Bachelor of Information Technology undergraduate at SLIIT with hands-on experience in Software Engineering, Full-Stack Web Development, Frontend Development, Backend Development, UI/UX Design, Data Science, Machine Learning, Data Analytics, and Business Intelligence. Skilled in designing and developing scalable web applications, REST APIs, predictive machine learning models, interactive dashboards, and database-driven systems using MERN Stack, Java, Python, JavaScript, TypeScript, React.js, Spring Boot, Node.js, SQL, MongoDB, and Power BI. Passionate about building innovative, user-centric software solutions and leveraging data-driven technologies to solve real-world problems through modern software engineering and analytical practices. Recognized as a quick learner with strong analytical thinking, problem-solving, effective communication, adaptability, teamwork, and a continuous learning mindset.

Technical Skills

Programming Languages: Python, Java, JavaScript, TypeScript, R, SQL
Web Development: React.js, Next.js, Node.js, Express.js, Nest.js, Spring Boot, REST APIs, HTML5, CSS3, Bootstrap, MERN Stack
Databases: MySQL, MongoDB, SQL Server (SSMS)
Data Science & BI: Data Analytics, Data Warehousing, Machine Learning, Statistical Analysis, Power BI, R Studio, Google Colab, Advanced Excel
Tools & Platforms: Git, GitHub, GitHub Actions, Postman, VS Code, Android Studio, Figma, Apache Tomcat
Soft Skills: Analytical Thinking, Problem Solving, Communication, Teamwork, Adaptability, Decision Making

Education

Bachelor of Information Technology (BSc Hons) Data Science Specialization Sri Lanka Institute of Information Technology (SLIIT)	2023 – Present
G.C.E. Advanced Level (Physical Science Stream) Passed (Combined Mathematics: C, Chemistry: C, Physics: S)	2022
G.C.E. Ordinary Level Passed with 6A, 2B, and 1C	2018

Professional Certifications

- Higher National Diploma (HND) in Information Technology – Sri Lanka Institute of Information Technology (SLIIT)
- Dean’s List (1st Year, 1st Semester), SLIIT
- Python for Beginners – University of Moratuwa
- Web Design for Beginners – University of Moratuwa
- MongoDB Atlas Administrator Path Course

Data Analytics Projects

Olist E-Commerce Sales Analysis Technologies: Python, Pandas, NumPy, SQL, Power BI, Matplotlib, Seaborn	<i>Individual Project</i>
- Analyzed the Brazilian Olist e-commerce dataset to identify sales performance, customer purchasing behavior, and operational trends. - Designed ETL workflows by cleaning, transforming, and integrating multiple datasets for accurate analysis. - Developed interactive Power BI dashboards to monitor revenue, delivery performance, customer satisfaction, and product category insights. - Presented data-driven recommendations to improve business decision-making based on analytical findings.	
Airbnb Data Analysis Technologies: Python, Pandas, NumPy, Matplotlib, Seaborn, Power BI	<i>Individual Project</i>

- Explored Airbnb listing data to evaluate pricing trends, availability, host activity, and customer review patterns.
- Applied data preprocessing and feature engineering techniques to improve data quality and analytical accuracy.
- Created visual reports and dashboards that highlighted key market trends and business insights.
- Interpreted analytical results to support strategic decision-making using real-world data.

Academic & Software Development Projects

Student Performance Analytics

Individual Project

Technologies: Python, Streamlit, Pandas, Scikit-Learn

- Developed an interactive machine learning application to analyze student performance factors.
- Applied regression models and data preprocessing techniques to generate predictive insights.

Business Analytical Project

Year 3 Semester 1

Technologies: Power BI, SQL Server, Excel

- Designed ETL processes and dimensional data models for business reporting.
- Built interactive Power BI dashboards to visualize key performance indicators.

HR Analytical Research Project

Year 3 Semester 1

Technologies: R Studio, Statistical Analysis

- Conducted statistical analysis on HR-related organizational data.
- Applied data visualization and inferential analysis techniques to support findings.

Smart Campus Web Application (Group Project)

Year 3 Semester 1

Technologies: Spring Boot, React.js, MySQL, Spring Security, GitHub Actions

- Developed backend services using Spring Boot and Spring Data JPA.
- Implemented authentication, authorization, and CI/CD workflows.

Eco Cycle – Plastic Bottle Recycling System (Project Lead)

Year 2 Semester 2

Technologies: MongoDB, Express.js, React.js, Node.js

- Led development of a MERN-based recycling management platform.
- Designed APIs and database structures to support operational workflows.

HabitGo Mobile Application

Year 2 Semester 2

Technologies: Android Studio, Kotlin, SharedPreferences

- Developed an offline habit-tracking application with local data persistence.
- Implemented JSON-based storage and user activity management features.

AIT AI Therapist Mobile Application

Year 2 Semester 2

Technologies: Android Studio, Kotlin, XML, Figma

- Designed and developed user interfaces for an AI-powered mental wellness mobile application.
- Created multiple screens including onboarding, login, chat interface and user profile pages.
- Implemented screen navigation using Android Intents and applied modern UI/UX design principles.
- Developed responsive layouts using ConstraintLayout, LinearLayout, ScrollView, and reusable Android components.

Hotel Booking Mobile App UI Design (HotelEase)

Year 2 Semester 2

Technologies: Figma

- Designed a hotel booking mobile application prototype including search, booking, profile, and payment screens.

Online Event Planning System (Project Lead)

Year 2 Semester 1

Technologies: Java, HTML, JavaScript, Bootstrap, MySQL

- Developed an event planning and booking system using object-oriented programming principles.
- Led project coordination and backend integration activities.

Mr Taxi – Car Rental Web Application

Year 1 Semester 2

Technologies: HTML, CSS, JavaScript, PHP, MySQL

- Developed a responsive car rental website with booking functionalities.
- Integrated database-driven operations for vehicle and customer management.

Languages

English

Sinhala
